

Analytical Development

Analytical control strategy
for your product lifecycle

Our team has decades of cell and gene therapy development experience and can help you achieve maximum return on investment with:

- + Phase-appropriate designs:** A systemic approach to analytical and control strategies to support your program, wherever you are in development
- + Robust analysis:** Comprehensive battery of molecular, biochemical, immunologic, phenotypic, physical and biological assays
- + Product characterization:** Testing for preclinical, starting material, in-process samples, drug substance, final products and more
- + Consistent product quality:** Quality-by-Design methodology that ensures assays are suited for intended use and can advance through each phase
- + Suitability:** Specific, sensitive, accurate, and precise results derived from state-of-the-art instrumentation, reagents, and scientific expertise
- + Value:** Efficient transfer from development to the QC lab, with phase-appropriate validation per ICH guidelines.
